Professional Summary

Software Developer with 3+ years of experience building scalable enterprise, healthcare, ERP, and cloud-integrated applications using ASP.NET Core, Angular, React, Blazor, SQL Server, PostgreSQL, Azure, and Docker. Experienced in backend architecture, reusable platform development, AI-powered automation, enterprise integrations, and supporting international clients with distributed engineering teams.

Technical Skills

Languages: C#, JavaScript, TypeScript, SQL, HTML5, CSS3

Frontend: Angular, React, Blazor, Bootstrap, Tailwind, jQuery

Backend: ASP.NET Core, ASP.NET MVC, .NET APIs, Entity Framework, LINQ, REST APIs, WebForms

Databases: SQL Server, PostgreSQL, Stored Procedures, Query Optimization, SQL Server Reporting

Cloud/DevOps: Azure, Azure AD, Azure Blob Storage, Azure Document AI, Docker, Linux, IIS

Integrations: MIPS, Micros, UberEats, Yumbi(Snow Flake), Deposita, Google BigQuery, Dynamics GP

Tools: Git, GitHub, Postman, Jira, SonarQube, Visual Studio, GitHub Copilot, Cursor AI, Open Code, Claude Code, GPT

Security: Security Assessment, Secure APIs, Infrastructure Security

Experience

DataSmith

May 2025 – Present

Software Developer (Remote)

South Africa

- Develop enterprise systems using ASP.NET Core, Blazor, SQL Server, PostgreSQL, Docker, and Linux
- Lead reusable backend platform development, enterprise integrations, permissions, roles, configs, accounts, and app versioning systems
- Integrated MIPS, Micros, UberEats, Yumbi, Deposita, Google BigQuery, and Dynamics GP into ERP systems
- Built AI-powered Invoice OCR automation using Azure Email Reader, Azure AD, Blob Storage, and Azure Document AI
- Collaborated with international engineering teams and supported international clients

Techsasoft

Jul 2023 – Apr 2025

Software Developer

Pakistan

- Developed enterprise healthcare applications using ASP.NET Core, Angular, React, SQL Server, and REST APIs
- Contributed to Techsacare ecosystem including EHR systems, CMS platforms, and healthcare mobile APIs
- Worked on MyClinic, a Saudi-based hospital management system with multiple enterprise services
- Enhanced legacy .NET Framework/WebForms systems and optimized backend workflows and SQL performance
- Supported international clients and collaborated with remote cross-functional teams

Key Projects

Techsacare Ecosystem: EHR systems, CMS platforms, and healthcare mobile APIs.

MyClinic: Saudi-based hospital management and healthcare platform.

Invoice OCR Automation: Azure-based automated invoice processing with Dynamics GP integration.

SysServer Platform: Reusable server platform using Blazor, .NET APIs, SQL Server, and PostgreSQL including permissions, configs, apps, roles, and versioning.

Enterprise Integrations: MIPS, Micros, UberEats, Yumbi, Deposita, and Google BigQuery integrations.

Achievements

- Led reusable backend platform development reducing engineering effort across multiple enterprise projects
- Delivered AI-powered invoice automation workflows and enterprise integrations for international clients
- Assisted in architecture planning, backend optimization, secure APIs, and scalable enterprise solutions

Certifications

Google Cybersecurity Professional Certificate — Microsoft Security, Compliance & Identity Fundamentals — PCAP Python — NDG Linux Essentials — EF Standard English Test Certificate (Score: 74/100 — C2 PROFICIENT)

Education

BS Computer Science

2021 – 2023

Islamia University of Bahawalpur, Pakistan — CGPA: 3.95
